

Alfa Laval AC65 /ACH65

Brazed plate heat exchanger for air conditioning and refrigeration

Introduction

Alfa Laval AC brazed plate heat exchangers provide efficient heat transfer with a small footprint. They are specifically designed to work in air conditioning and refrigeration applications as evaporators and condensers in chillers and heat pumps.

Applications

- Evaporator
- Condenser
- Cascade systems

Benefits

- Compact
- Easy to install
- Self-cleaning
- Low level of service and maintenance is required
- All units are pressure and leak tested
- Gasket free

Branded Features

DynaStatic™

Flexible refrigerant distribution

FlexFlow™

Superior thermal performance

IceSafe

Controlled, non-destructive freezing

PressureSecure

Unparalleled strength for demanding duties

REFuture

A future-proof investment for tomorrow's refrigerants

ValuePlus

Total support – with value-adding options to fit your needs

Design

The brazing material seals and holds the plates together at the contact points ensuring optimal heat transfer efficiency and pressure resistance. Using advanced design technologies and extensive verification guarantees the highest performance and longest possible service life.

Asymmetric channels provide optimal efficiency in the most compact design. This results in low refrigerant charge or lower pressure drop on the water or brine side, reducing the CO₂ footprint.

Designed for high-efficiency applications, such as those applications with high evaporation temperature and low water/brine pressure drop. This results in reduced environmental impact and lower costs.

The integrated distribution system ensures an even distribution of the refrigerant throughout the plate package.

Based on standard components and a modular concept, each unit is custom-built to meet the specific requirements of each individual installation.

Suitable with most HFC, HFO and natural refrigerants.

Technical Data

Standard materials

| | |
|----------------|-----------------|
| Cover plates | Stainless steel |
| Connections | Stainless steel |
| Plates | Stainless steel |
| Brazing filler | Copper |

Dimensions and weight ¹

| | |
|--------------------------|----------------------|
| A measure (mm) | $11.5 + (1.38 * n)$ |
| A measure (inches) | $0.45 + (0.05 * n)$ |
| Weight (kg) ² | $2.1 + (0.14 * n)$ |
| Weight (lb) ² | $69.44 + (3.00 * n)$ |

¹ n = number of plates

² Excluding connections

Standard data

| | |
|---------------------------------------|--|
| Volume per channel, litres (gal) | S1-S2: 0.088 (0.0232) S3-S4: 0.046 (0.0122) |
| Max. particle size, mm (inch) | 0.7 (0.028) |
| Max. flowrate m ³ /h (gpm) | 11 (48.4) |
| Flow direction | Parallel |
| Min. number of plates | 10 |
| Max. number of plates | 120 |
