NovoNox

Inox Components

NovoNox is now NOVOnox hygienic

Initially, the idea was to offer significant additional benefits to KIPP customers from the foodstuff, chemical, pharmaceutical, medical technology and machine construction branches. They knew KIPP as a reliable supplier of high quality operating parts, but must obtain hygienic stainless steel parts from somewhere else.

However, the INOX experts NovoNox with their Hygienic DESIGN und Hygienic USIT® product ranges experienced serious challenges within this growth orientated market. The existing structure was not equipped to meet the ever increasing demand.

NOVOnox hygienic

The solution:

Consolidating the strengths under one roof through a takeover of the NovoNox brand and integrating the products and the business processes into HEINRICH KIPP WERK.

The result:

A clearly coordinated complete program of standard operating parts and hygienic stainless steel parts combined with maximum service and guaranteed availability - for all customers.

As a new product line, the high quality hygienic stainless steel products **NOVOnox hygienic** form a completely new field of competence within the KIPP OPERATING PARTS | STANDARD ELEMENTS catalogue programs. The consistency of the expanded range offers compelling advantages for KIPP and NovoNox customers.

The slogan "Clean & Lean" says it all. "Clean" the hygienic products, "Lean" the trimmed down purchasing process including better availability and customer orientated service with shorter response times.

A win-win situation for KIPP and NovoNox customers

KIPP customers can now profit from excellent know-how in the hygienic sector and a new quality in special solution development competence directly from the manufacturer.

With KIPP, NovoNox customers profit from the sales network and infrastructure of an active partner as well as the roughly 36,000 comprehensive product range. A central logistics system with up to the minute storage technology and powerful IT solutions means that KIPP can guarantee rapid delivery and worldwide availability. This all leads to a clear plus point for reliability and service. For NovoNox customers the extensive distribution network within Germany and the rest of Europe will be new.

A well structured worldwide network of international subsidiaries and sales partners guarantees optimum consultation and competent service. Customer support plays a very important role at KIPP. The experienced team of experts at HEINRICH KIPP WERK supply individual advice and always have the correct answer to realise customer-specific projects. The award of VERY GOOD from "TÜV Service Tested" proves this excellent customer orientation.

With the integration of NOVOnox hygienic, KIPP has positioned itself as a cross-sector single-source supplier with a broadly diversified market presence. KIPP expands its sector competence and generates new knowledge through new demands.

Hygienic DESIGN - the new standard

**Operating parts and machine elements that fulfil
the requirements of Hygienic DESIGN.**

Radii, transitions, bevels, and surfaces are designed to impair wetting
and can be easily cleaned or remain permanently unsoiled.

Nothing adheres!

Average surface finish
 $Ra < 0.8 \mu m$

HU°

Hygienic USIT® - the new phenomenon in the process industries

Hygienic USIT® is the new revolutionary sealing and
fastening technology in one package. High-gloss polished surfaces,
radii, bevels and form transitions are cavity-free.

Hygienic USIT® – a trademark of Freudenberg Sealing Technologies.
NOVOnox developed the hygienic screw system for this special washer
and matched them perfectly to each other.
The cavity-free fastening point is made feasible.

High-gloss polished!

Material:
1.4404 grade A4
with $Ra < 0.8 \mu m$

100 % seal!

Hygienic USIT® seal
and shim washer from
Freudenberg Sealing Technologies.

System unit!

Collar for Hygienic USIT®
seal and shim washer

Material:
1.4404 grade A4-70
with $Ra < 0.8 \mu m$

Hygienic USIT® - give germs no chance

The current status. Cavities. Not fully sealed.

Fastening points in process technology plant construction must be absolutely sealed and easy to clean. Cavities where product remains or cleaning fluids can accumulate unnoticed are to be prevented. These create breeding grounds for germs and bacteria. A contamination is often just a question of time.

The solution:

Hygienic USIT® from Freudenberg Sealing Technologies solves the problem. The new type of washer with the specially matched screw system from NOVOnox hygienic. Dirty liquids bead off. Nothing can adhere. Nothing can germinate. Hygienic USIT® is the new revolutionary sealing and fastening technology in one package. Screw heads, nuts, washers and screw shafts are perfectly matched to each other and form a system unit. High-gloss polished surfaces, radii, bevels and form transitions are cavity-free and enable easy cleaning.

Sealed over and over again.

The sealing ring made of a metallic flat seal and a vulcanised sealing bead is the heart of Hygienic USIT®. The trapezoidal contour of the sealing bead and the highly polished face of the screw head positively seal the fastening point. The sealing properties remain constant even by repeated loosening and tightening of the screw. The reason: The metallic washer mechanically limits the screw travel when the screw is turned. Excessive pressure on the seal is prevented. The polished surface and the centring effect of the screw shaft ensure that the position and deformation of the seal is almost 100% reproducible.

Hygienic USIT® – High-gloss polished surface

The Hygienic USIT® fasteners have a completely rounded body form and have been designed for use with the USIT® sealing ring. The runoff of liquids and product residues is guaranteed independent of the installed position. The surfaces are repeatedly finely polished. When USIT® seal rings are used, the fastening point is hermetically sealed without any cavities. The fastening point is hygienically safe

Conclusion:

With the washer from Freudenberg Sealing Technologies and the special screw system from NOVONox hygienic, a sealing and fastening component that is 100 % hygienic and cavity-free has been created for the first time.

Hygienic Tools – smooth stays smooth

Protective inserts protect sensitive surfaces.

Protective inserts have been developed so that the sensitive surfaces of the screws and nuts of the Hygienic USIT® screw and sealing system remain completely undamaged. These high-strength plastic or aluminium protective inserts prevent scratches on the screws and nuts. Moreover, they also protect from possible contact corrosion between the tool and the

stainless steel fastener. The protective inserts are inserted into tools which have been specially modified to accept them. The inserts clip in place so that they cannot be easily pulled out or lost. The inserts are available for screws sized M3, M4, M5, M6, M8, M10, M12 and M16.

Cap nuts with collar

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:
Stainless steel 1.4404.

Version:
High-gloss polished.

Sample order:
K1328.05

Note:
Cap nut with collar for Hygienic USIT® sealing and shim washer.

Only the combination of a Hygienic USIT® sealing and shim washer and the specially designed cap nuts assures a cavity-free seal.

This is essential especially in product contact areas or within aseptic insulators.

The surface of the nuts and the contact face of the sealing and shim washer are high-gloss polished. Thanks to the extremely high quality surface finish of less than Ra 0.8 µm, almost no dirt particles adhere to the surface. Easy cleaning is assured by the high-gloss polished surface.

No countersink or recess on the screw head, no embossing or toothing beneath the flange.

On request:
Tool from SW 8 mm - SW 24 mm.

Accessories:
Hygienic USIT® sealing and shim washer K1326.

Hygienic USIT® sealing and shim washer

Freudenberg Process Seals

Material:

Stainless steel 1.4404.

Rubber beading:

70 EPDM 291 black

70 EPDM 253815 white

75 Fluoroprene XP 45 blue

Sample order:

K1326.051

Note:

Flat metallic seal with elastomer beading for cavity-free, static sealing of screw connections. The Hygienic USIT® sealing and shim washer forms a cavity-free seal on product contact surfaces or within aseptic isolators only when used in conjunction with the specially designed screw or nut (see Art. No. K1327 and K1328). The sealing and shim washer reliably eliminates cavities on screw connections. Residual material or cleaning agents cannot precipitate unnoticed and so contamination through microbes and bacteria is negated.

Application:

Even if the rubber beading cannot be overstressed by the integrated stainless steel washer when the fastening is tightened, every material reaches the end of its life-cycle sometime. Fragments could get into the foodstuff. The different sealing materials and their colours are not just for fulfilling the respective user applications, but also to ensure product specific ease of detectability.

70 EPDM 291 - black

Used mainly in the processing and beverage industries and in dairies.

70 EPDM 253815 - white

Predominantly used in medical technology and pharmaceutical industries

75 FLUOROPRENE® XP 45 - blue

For special requirements such as very fatty, aggressive mediums and very high temperatures that could occur during e.g. cleaning the plant.

Naturally, all sealing materials are also suitable for individual packaging tasks.

Accessories:

The Hygienic USIT® sealing and shim washers can be used with all other products of the **Hygienic USIT®** range.

Clamping lever with internal thread and collar

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:

Metal parts stainless steel 1.4404.
Surface high-gloss polished.
Shaft seal 70 EPDM 291.

Sample order:

K1316.308

Note:

Clamping lever designed for the hygienic sector.
The completely closed grip part and the shaft seal prevent contamination of the lever internal workings. Additionally, the screw insert has a conical collar so that the fastening point can be hygienically sealed with the Hygienic USIT® sealing and shim washer. Due to the extremely high surface finish quality of much less than Ra 0.8 µm, hardly any dirt particles adhere to the surface. The highly polished surfaces enable easy cleaning.
At rest, the lever is freely rotatable. Unintended opening of the lever is excluded. The tothing is protected against high wear for mounting on vibrating elements.

On request:

Other thread depths and inch threads.

Accessories:

Hygienic USIT® sealing and shim washer K1326.

Wing nut

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:

Steel parts stainless steel 1.4404.
Surface high-gloss polished.

Sample order:

K1312.2004

Note:

The wing nut makes simple screw connections superbly feasible. They can be easily opened or re-tightened without tools.
The complete surface is polished to a high gloss with a surface finish of much less than Ra 0.8 µm. The contour is produced with generous radii and transitions. It doesn't matter in which position the wing grip is mounted, dirt and residue from products or cleaners seldom adheres. Easy cleaning is ensured. The Hygienic USIT® sealing and shim washers from Freudenberg Process are used to seal the screw-on point. The shaft of the wing nut is specially designed to suit this seal. An almost cavity-free seal of the screw-on point is created which satisfies hygienic regulations.

On request:

Inch threads, thread lengths.

Accessories:

Hygienic USIT® sealing and shim washer K1326 for the screw-on surface.

Wing screw

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:

Steel parts stainless steel 1.4404.
Surface high-gloss polished.

Sample order:

K1313.2004X8

Note:

The wing screw makes simple screw connections superbly feasible. They can be easily opened or re-tightened without tools.

The complete surface is polished to a high gloss with a surface finish of much less than $Ra\ 0.8\ \mu m$. The contour is produced with generous radii and transitions. It doesn't matter in which position the wing grip is mounted, dirt and residue from products or cleaners seldom adheres. Easy cleaning is ensured. The Hygienic USIT® sealing and shim washers from Freudenberg Process are used to seal the screw-on point. The shaft of the wing screw is specially designed to suit this seal. An almost cavity-free seal of the screw-on point is created which satisfies hygienic regulations.

On request:

Inch threads, thread lengths.

Accessories:

Hygienic USIT® sealing and shim washer K1326 for the screw-on surface.

Mushroom knobs male thread with low head

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:

Steel parts stainless steel 1.4404.
Surface high-gloss polished.

Sample order:

K1311.2004X8

Note:

The low head makes the mushroom knob ideal for manual lateral movements.

The complete surface is polished to a high gloss with a surface finish of much less than Ra 0.8 µm. The contour is produced with generous radii and transitions. It doesn't matter in which position the mushroom knob is mounted, dirt and residue from products or cleaners seldom adheres. Easy cleaning is ensured.

The Hygienic USIT® sealing and shim washers from Freudenberg Process are used to seal the screw-on point. The shaft of the mushroom knob is specially designed to suit this seal. An almost cavity-free seal of the screw-on point is created which satisfies hygienic regulations.

On request:

Inch threads, thread lengths, form variations.

Accessories:

Hygienic USIT® sealing and shim washer K1326 for the screw-on surface.

Pull handles

for Hygienic USIT® sealing and shim washer Freudenberg Process Seals

Material:
Stainless steel 1.4404.

Version:
High-gloss polished.

Sample order:
K1364.30006

Note:
Solid pull handles, polished overall to a high gloss. The resulting surface finish of less than Ra 0.8 µm allows residue from products or cleaners to seldom adhere. This, together with the large radii make the handle extremely easy to clean.
Through the optionally available support disc, the contact surface i.e. the transferable force is considerably increased.
Screwing on directly or using the intermediate support disc is carried out using the Hygienic USIT® sealing washer from Freudenberg Process Seals. The as normal time-consuming welding of the handle, grinding and polishing the weld is not required. All fastening points and the screw-on surface are hygienically handled.

On request:
External threads, inch threads, longer and higher versions.

Accessories:
Hygienic USIT® sealing and shim washer K1326 for the screw-on surface and the support disc.

Ball head screw

in Hygienic DESIGN

Material:

Stainless steel 1.4404.

Version:

Polished.

Sample order:

K1329.06X20 (include length L)

Note:

Ideal elements for fastening cladding panels, Plexiglas covers etc. The oversized flange and the thread undercut ensure a stress-free, uniform force distribution on the respective surfaces. Projecting edges are kept to a minimum by the head height being kept as low as possible. An open-end spanner is used to screw the fastener in.

The surface of the ball head screw is polished and, with regard to design optimised for the use in hygienic environments. The surface is polished to a surface finish of less than $Ra\ 0.8\ \mu m$. Dirt and residue from products or cleaners seldom adheres and easy cleaning is ensured.

Accessories:

For damage-free tightening and loosening of the screw we recommend the open-end spanners with protective cap, see article No. K1362 ... together with the protective caps K1362 ...

Hexagon bolts with narrow shaft

in Hygienic DESIGN

Material:

Stainless steel 1.4404.

Version:

Polished.

Sample order:

K1330.06X30 (include length L)

Note:

Narrow shaft bolts are preferably secured against unintentional loss with a retaining element. This satisfies the EU standard 2006/42/EG. With the optionally available retaining washer the bolt is permanently combined with the component before screwing in. The washer is screwed over the threaded section and can then move freely on the narrow shaft. The shaft is not damaged by e.g. notching caused by a spring effect. By manual operation it is not possible that the washer screws itself out again. However, by careful manipulation the washer can be removed from the bolt without damaging either.

The surface of the hexagon head bolt is polished and, with regard to design optimised for the use in hygienic environments. The bolt head is convex on the top face and the collar has a conical formed top surface. Instead of troublesome embossing or indentations, the bolt head is smooth with a surface finish of less than Ra 0.8 µm. Dirt and residue from products or cleaners seldom adheres and easy cleaning is ensured.

On request:

Inch threads, thread lengths, shaft lengths

Accessories:

Locking washer K1331.

Cap nut compact

in Hygienic DESIGN

Material:

Stainless steel 1.4404.

Version:

Polished.

Sample order:

K1332.08

Note:

The surface of the cap nut is polished and, with regard to design optimised for the use in hygienic environments. The top of the nut is spherical and the collar has a conical formed top face. The nut has been designed as a low version so as to keep troublesome corners as few as possible. Due to the extremely high quality surface finish of much less than $Ra\ 0.8\ \mu m$, hardly any dirt particles adhere to the surface.

On request:

Inch threads, high versions.

Quarter-turn locks in Hygienic DESIGN

Material:

Housing and actuation: 1.4404.
 Earthing nut and ratchet screw: 1.4301.
 Seal: blue silicon, FDA conform.
 Tongue 1.4301 stainless steel.

Version:

Bright.

Sample order:

Quarter turn lock K1354.18
 Tongue K1340.45060

Note:

The hygienic stainless steel quarter turn lock prevents bacterial attack and fulfils the strict regulations of testing principles for foodstuff machinery and hygien. The well conceived geometric form, the mirror polished stainless steel surface and the central circumferential seal reliably prevent dirt accumulation. Water, cleaning agents etc. can drain off fully and so prevent contamination.

Especially in processes where the resistance of the seal to cleaning and disinfection agents is very important, optimised control cabinets, terminal boxes and command panels are a must. Specifically designed after the principles of Hygienic DESIGN, the hygienic quarter turn lock HD fulfils the strict regulations of the foodstuff processing industry and passes therefore optimally in their professional hygienic applications.

The special seal is suitable for high pressure washing up to max. 100 bar and fulfils IP65/67. Furthermore, the seal is temperature stable up to 80°C and the blue colour satisfies FDA regulations (reliably prevents a confusion with foodstuffs).

Please order required tongue version separately. Every tongue can be combined with every housing.

NOVOnox hygienic Tools

**Material:**

Tools: tool steel.

Protective insert: PETP.

Protective cap: AlSi1MgMn.

Version:

- Protective caps for open-ended spanners 7 / 8 / 10 / 13 / 16 / 18 and 24 mm
- Protective inserts for ring spanners 7 / 8 / 10 / 13 / 16 / 18 and 24 mm
- Protective inserts for sockets 7 / 8 / 10 / 13 / 16 / 18 and 24 mm
- Spanners and sockets designed for the inserts and caps
- Socket wrench ½" length 275 mm
- Socket wrench ½" length 199 mm
- Extensions ½" lengths 248 mm, 76 mm and 45 mm
- Swivel extension ½" length 46 mm
- Universal joint ½" length 70 mm
- Tommy bar ½" length 298 mm

Sample order:

K1363.1

Note:

Tool set with ½" drive and protective insert specially designed for tightening and loosening screw connections with sensitive surfaces - see article No. K1361 and K1362.

Apart from a complete set of protective caps and inserts, the tool case also contains the matching special tools. To complete the set normal drive and aid tools are also included.

All parts are set into a special moulding and prevented from falling out when the case is opened. The case itself can be fully opened 180° so that all tools and parts are immediately available. It is also immediately obvious if all protective inserts are available in adequate amounts or if they must be specifically re-ordered.

Application:

Fastening of surface sensitive nuts and screws for hygienic areas.

Additionally, soiling due to contact corrosion is reliably prevented.

Also for other sensitive visible parts on automobiles and motorbikes and in the sanitary branches.

On request:

Other AF sizes, tools and protective inserts for ¼" drive.

Attention:

To prevent contact corrosion the tools should not be used with normal steel fasteners.

Note:

Socket:

Socket with 1/2" drive, made by Hazat. Specially modified, for holding the plastic inserts. The plastic inserts are securely held by the inner form and length of the socket. Optimal drive torque is transmitted to the screw head. By careful use, metallic contact between the socket and the hex head is prevented. Contact corrosion is eliminated.

Plastic inserts:

Plastic inserts for tightening and loosening screws and nuts, specially designed for Hygienic DESIGN and other stainless steel fasteners. Polished and sensitive surfaces are protected and a later contact corrosion is avoided.

The plastic inserts are made from a specially manufactured PETP and have FDA approval. The inserts are pressed into the special socket manually. The form fit and locking device ensures an optimal hold in the socket. No special tools are required to exchange the worn out inserts.

By a tightening torque of μ 0.12 coefficient of friction (DIN for A4-70 for screws and nuts), the plastic inserts have a life expectancy of up to 1000 alternating cycles.

Combination spanner with protective caps

Material:

Combination spanner tool steel.
Protective cap AlSi1MgMn.

Sample order:

K1362.10 combination spanner
K1362.1007 caps for open-end spanner
K1362.11007 caps for ring spanner

Note:

The protective cap was specially developed for tightening and loosening screw connections with sensitive surfaces. With normal tools, the surface of polished screws are so damaged even by the first tightening, that cavities are created making easy and effective cleaning no longer possible.

The protective caps ensure damage free tightening and loosening of fasteners with outer contours. The soft aluminium leaves no scratches or other damage on sensitive surfaces. As the aluminium cap is placed over the hard tool steel, the actual tightening load / tightening torque is taken up by the combination spanner. By proper and professional use the protective caps have a service life of ca. 1000 operating cycles.

Additionally, with the protective caps the risk of contact corrosion is reliably prevented on stainless steel fasteners. The projecting contour largely prevents unintentional contact points between spanner and stainless steel screw. The protective caps are made of the aluminium alloy EN AW 6082 and so comply with EN 602 - aluminium in contact with food. The protective cap is safely held in the spanner by a special moulding or sprung clip element. The cap cannot fall out on its own. Damaged protective caps can be exchanged manually.

On request:

Other sizes.

Levelling feet Hygienic DESIGN

Material:

Foot plate stainless steel 1.4301.
Threaded spindle stainless steel 1.4301.
Rubber base (NBR) Shore 85 +/-5, FDA tested.
Rubber seal, silicone, FDA tested.

Version:

Foot plate, high-gloss polished. Threaded spindle, bright.
Rubber base, black. Rubber seal, blue.

Sample order:

K1303.108016X140
(include length L)

Note:

Certified according to 3-A Sanitary Standard 88-00.

The high surface quality, the double sealing of the thread and the special seal on the machine foot's spindle joint prevent dirt from sticking and reduce cleaning times to a minimum.

The machine foot is supplied with the 3-A logo.

Application:

The machine foot is particularly suitable for machines, plants and appliances in the foodstuff industry, breweries, dairies, beverage and pharmaceutical industries.

Accessories:

Hygienic USIT® sealing and shim washer K1326.
Hexagon cap nut with collar K1328.
