### Technical Information

#### Pneumatic Specification

Pressure Range (Locked Cylinder):

3~7 bar [40~100 psi] (QC/TP, RHC Series)

4~7 bar [60~100 psi] (RQC/RTP Series)

Cylinder Type: Double Acting, Spring Assist

Valve Required to Actuate:

3-way, 2-position (QC-30 only)

4-way, 2-Position

#### Air Quality Requirements

Air Filtration: 40 Microns or Better

Air Lubrication: Not Necessary\*

Air Humidity: Low Moisture Content (Dry)

(\*Addition of lubrication will greatly increase service life.

#### Temperature Operating Range

Buna-N-Seals: -35°~80° C [-30°~180° F] (All Models)

Viton® Seals: -30°~150° C [-20°~300° F] (RHC Series)

#### Maintenance Specification

Expected Life: Normal Application: 5 Million Cycles

With Preventative Maintenance: 10+ Million Cycles

Repeatability: ±0.025mm [±0.001 in]

Field Repairable: Yes

Seal Repair Kits Available: Yes

#### Application Restrictions

- Dirty or Gritty Environments
- Machining Operations Generating Chips
- Environments with Loose Particulates

# ROBOTIC TOOLING SOLUTIONS

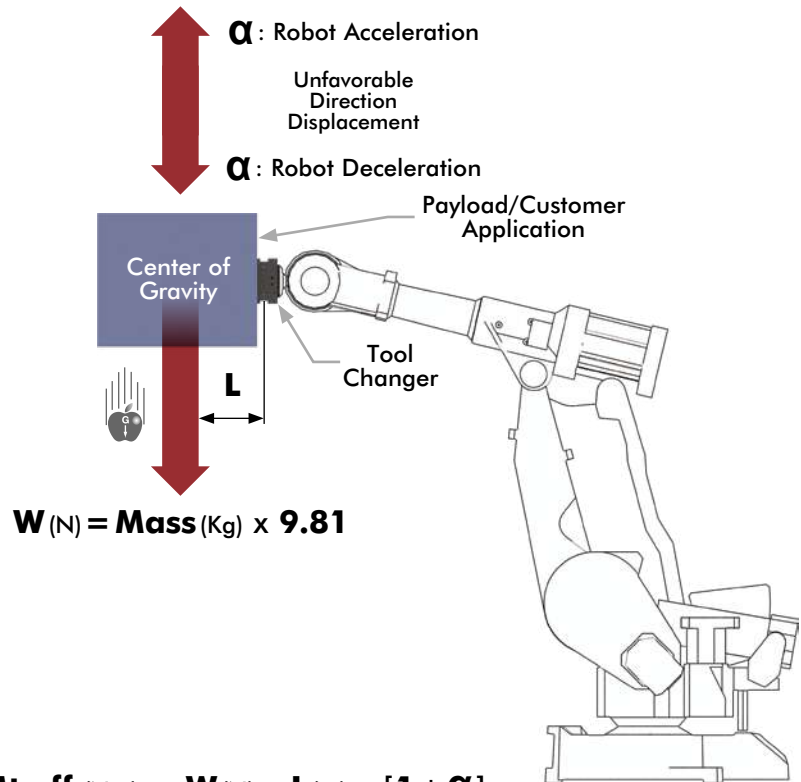

## Automatic Tool Changer Sizing Guide

For tool changer sizing, the maximum effective moment during displacement will be considered. The effective moment will be calculate in the worst case of the application, and must consider:

- The weight of the tool
- The position of the center of gravity
- The dynamic effect due to the maximum acceleration or deceleration. (Emergency stop for example)

See below the simplified calculation formula to estimate the effective moment of your application.

Required Information		
<b>M</b>	Mass of the tool attached on the tool changer	<b>Kg</b>
<b>L</b>	Distance from the payload center of gravity to the tool changer	<b>m</b>
<b>α</b>	Maximum acceleration or deceleration of the robot	<b>g</b>

**Effective Moment** →  $M_{t \text{ eff}} \text{ (Nm)} = W \text{ (N)} \times L \text{ (m)} \times [1 + \alpha]$

**CAUTION: Applications with high and wide loads:** in case of heavy application, we strongly recommend to strengthen the cylindrical and diamond indexing pins, between tool changer and tool plate, by adding larger diameter pins, the farthest to the center of changer tool, incorporated into the design of the tooling.

## Application Example

Application Data	
Mass of tool	90 kg
Center of gravity / Tool Changer	0.5 m
Acceleration (or deceleration) of displacement	2 g

$$M_{t \text{ eff}} = (90 \times 9.81) \times 0.5 \times (1 + 2)$$

$$M_{t \text{ eff}} = 883 \times 0.5 \times 3$$

$$M_{t \text{ eff}} = 1324.5 \text{ Nm}$$

### Loading Capacity:

Max. Tensile **T**: 2670 N [600 lb]

Max. Compressive **C**: 3560 N [800 lb]

Max. Moment (**M<sub>x</sub>/M<sub>y</sub>/M<sub>z</sub>**) **1580 Nm [14000 in-lb]**

The obtained value 1324.5 Nm should be compared to the technical data of our products in this catalog in the "loading capacity information" section. For this application, the choice will be a RQC-400M tool changer that has a qualifying capacity, in terms of torque, of 1580Nm, over than the 1325Nm of the application.

## Tool Changer Docking Station

Destaco offers custom and standard Docking Stations to fit customers needs. Please contact Destaco Sales for more information.

**Key Features:**

- Allows for quick changing of tooling
- Reducing machine down-time
- Safely stores tooling when not in use
- Standard or custom stations

# RQC/RTP SERIES

## Automatic Tool Changers | Features and Benefits

### Robotic applications:

Perfect for those flexible/multiple tooling applications utilizing one Robot. This product was designed with exceptional repeatability, high rigidity & load capacity to make it ideal for any robotic application.

### Automation applications:

End effector tooling and interchangeable fixturing can be changed quickly and easily to accommodate many different styles of parts on the same assembly machine or machining center.

### Highly configurable, modular design (RQC/RTP):

The Modular RQC series easily accommodates up to (4) optional modular interfaces, offering a high level of flexibility.

### Additional Optional Air, Fluid, Electrical Modules are Available.

Air and fluid ports modules are available in NPT, BSPP, and BSPT (See Page TC-RQTP-17)

### Optional 19 Pin I/O Module

Spring loaded contacts are recessed for a better protection

V-Seal provides moisture resistance

**Tool Plate** has tapped holes, two dowel pin holes for accurate location of payload, and features a ISO9409-1 mounting pattern

**Robot Plate** has counterbored holes for mounting with a dowel pin hole, a raised boss for location, and features a ISO9409-1 mounting pattern

## Automatic Tool Changers | Features and Benefits

### Flexibility of the tool:

Cylindrical Horizontal compliance devices are used for inserting components that may be misaligned with the tool. They allow a horizontal displacement that compensates for part placing inaccuracies.

### For precision applications:

The use of high quality components allow to get centering repeatability from 0.02mm and angular repeatability from  $\pm 10^\circ$ .

### Harsh environments:

The enclosed design of this series allows them to be used in harsh environments.

### Spring assist:

Due to the optional spring assist, compliance may be used in single acting mode.

### Failsafe Operation

Failsafe locking spring keeps units coupled in the event of pressure loss

### Durable Components

Locking components are made from hardened bearing & tool steels

### Self Lubricating Seals

Self lubricating dynamic seals

## Automatic Tool Changers | Features and Benefits

### Robotic applications:

Perfect for those flexible/multiple tooling applications utilizing one Robot. This product was designed with exceptional repeatability, high rigidity & load capacity to make it ideal for any robotic application.

### Automation applications:

End effector tooling and interchangeable fixturing can be changed quickly and easily to accommodate many different styles of parts on the same assembly machine or machining center.

#### Durable Components

Locking components are made from hardened bearing & tool steels

#### Self Lubricating Seals

Self lubricating dynamic seals

#### Quality Materials

Each body is made of lightweight 7075-T6 aircraft quality aluminum

#### Pneumatic Ports

User pneumatic ports

#### Robot Plate

#### Tool Plate

#### Precision Cone Positioning

Machine tool proven mating conical coupling

#### Durable Finish

Bodies have hard-coat anodize 60RC with Teflon® impregnation

#### Electrical Contacts

(Sold Separately- See "How to Order" Section for more info)

#### Failsafe Operation

Failsafe locking spring keeps units coupled in the event of pressure loss

## Mounting Information

#### Robot Plate

mounts with screws from behind or through the front and locates with dowel pins for accuracy.

#### Tool Plate

mounts payload with screws from behind or through the front and locates with dowel pins for accuracy. Protect cone surfaces from debris to insure proper positioning.

## Cylindrical Horizontal Compliance Device | Features and Benefits

### Flexibility of the tool:

Cylindrical Horizontal compliance devices are used for inserting components that may be misaligned with the tool. They allow a horizontal displacement that compensates for part placing inaccuracies.

### For precision applications:

The use of high quality components allow to get centering repeatability from 0.02mm and angular repeatability from  $\pm 10^\circ$ .

### Harsh environments:

The enclosed design of this series allows them to be used in harsh environments.

### Spring assist:

Due to the optional spring assist, compliance may be used in single acting mode.

### Spring Assist

Spring assist option allows to center the tool (RA) or to release the tooling (RL). It also allows the use in single acting mode

### Quality Components

Made from aluminum alloy hard coat anodization. Main components are made of hardened and precision ground steel

### Air Ports

Side or top airports (top ports require O-rings)

## Mounting Information

The compliance is located using a pilot boss and a dowel pin and assembled using 4 or 6 through body screws

Tooling is located using a centering pin and a dowel pin and assembled using 4 screws

### Pneumatic Specification

Pressure Range (w/o springs): 2-7 bar [30-100 psi]  
 Pressure Range (w/springs CH-50): 3-7 bar [43-100 psi]  
 Pressure Range (w/springs): 4-7 bar [60-100 psi]  
 Cylinder Type: Double Acting, Double Acting Spring Assist, or Single Acting Spring Return  
 Dynamic Seals: Internally Lubricated Buna-N  
 Valve Required to Actuate: Double Acting: 4-way, 2-Position; Single Acting (-RL or -RA Option): 3-way, 2-Position

### Temperature Operating Range

Buna-N-Seals (Standard): -25°~80° C [-10°~180° F]

### Maintenance Specification

Expected Life: Normal Application: 5 Million Cycles  
 With Preventative Maintenance: 6+ Million Cycles  
 Field Repairable: Yes  
 Seal Repair Kits Available: Yes

### Air Quality Requirements

Air Filtration: 40 Microns or Better  
 Air Lubrication: Not Necessary\*  
 Air Humidity: Low Moisture Content (Dry)  
 (\*)Addition of lubrication will greatly increase service life.

## Tool Changer Docking Station

Destaco offers custom and standard Docking Stations to fit customers needs. Please contact Destaco Sales for more information.

**Key Features:**

- Allows for quick changing of tooling
- Reducing machine down-time
- Safely stores tooling when not in use
- Standard or custom stations
